FULL SONGS, NOT PREVIEWS

UNLOCK EVERY SONG WITH YOUR YOUTUBE KEY

Without a key, Mimo plays 30-second previews. Add a free YouTube Data API key and every song plays in full, on your phone, with the screen off and from the lock screen.

ONE-TIME SETUP

~99
NEW SONGS A DAY

WHAT YOU NEED

- A Google account (the one you use for Gmail or YouTube works)
- A browser on your phone or laptop, for Google Cloud Console
- Mimo installed and open on **Settings**

ARCH IT ✦ PLAY IT ✦ FULL SONGS ✦ SCREEN OFF ✦ LOCK SCREEN ✦ SEARCH IT

01 / GET THE KEY

SIX STEPS TO FULL SONGS

01
CREATE A GOOGLE CLOUD PROJECT

Sign in with Google, name it **Mimo**, press **Create**. Accept the terms if asked. It's free.

OPEN `console.cloud.google.com/projectcreate`

02
TURN ON YOUTUBE DATA API V3

With your **Mimo** project selected at the top, press **Enable**.

OPEN `console.cloud.google.com/apis/library/youtube.googleapis.com`

03
CREATE AN API KEY

Open Credentials, then:

CREATE CREDENTIALS → API KEY

OPEN `console.cloud.google.com/apis/credentials`

tip A key starts with `AIza` and is exactly 39 characters. Not the "OAuth client ID".

04
LOCK THE KEY TO YOUTUBE (RECOMMENDED)

On the key press **Edit API key** → **Restrict key** → tick only **YouTube Data API v3** → **Save**. Leave "Application restrictions" on **None** so the Android app can use it.

05
PASTE IT INTO MIMO

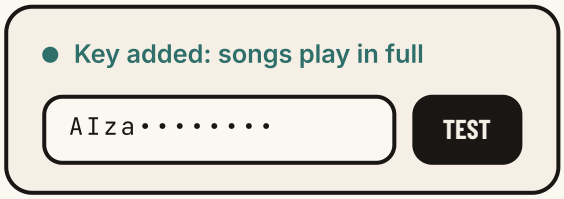

On the API keys row press **Show key**, copy it. In Mimo:

YOU → SETTINGS → FULL SONGS (YOUTUBE)

Paste it into **YouTube Data API key**.

06
TEST, THEN SAVE

Press **Test**. When it says *Working*, press **Save settings**.

02 / HOW IT RUNS

YOUR KEY, YOUR QUOTA

THE DAILY QUOTA

Google gives every key **10,000 units a day**. Finding a song's video costs 100, so that's about **99 new songs a day**.

1 new song = 100 10,000 / day

Songs you've played before are remembered on your phone and cost **nothing**. The count resets every day at **1:30 PM IST**.

KEEP IT SAFE

Your key stays only on your phone. Mimo **never** puts it in backups or exports.

Don't share it or post it online. If it ever leaks, delete it in Credentials and make a new one. It takes 30 seconds.

IF SOMETHING'S OFF

"API KEY NOT VALID"	Part of the key is missing or has a space. Copy it again with **Show key**, paste, and tap **Show** to check.
"API NOT ENABLED"	Step 2 was skipped, or another project is selected. Enable it, wait 2–3 minutes, press **Test** again.
"THAT'S AN OAUTH CLIENT ID"	You copied the wrong row. Use the row under **API keys**, not "OAuth 2.0 Client IDs".
"QUOTA EXCEEDED"	You played 99+ new songs today. Songs you've played before still work; new ones come back after 1:30 PM IST.
STILL 30-SECOND PREVIEWS	The key was tested but not saved. Press **Save settings**, then play the song again.

THAT'S IT

NOW GO PRESS PLAY
